SUMMARY

My name is Nate Worley and I currently work as a professional graphic designer in Dallas, TX. I have a huge passion for computers and a love for innovation and creating. I am currently attending DeVry University for a bachelors in Software Engineering and am enrolled in SMU's Full Stack Developer Coding Bootcamp. Leveraging my 6+ yrs of graphic design experience, I believe that this has well equipped me with the experience and skills needed to succeed in the tech and design industry. I have a strong desire to learn, am a team player, and have high learning agility to which I strongly believe makes me an invaluable asset to any business or organization. I'm ready to turn my innovative professional design insight, and programming skills and knowledge into a fulfilling career.

Coding Projects

Tech Blog | GitHub Repo
- This is a Tech Blog application that creates a CMS-style blog site. This site allows users to create an account, sign in to an existing account, leave posts, edit posts, delete posts, and comment on posts.

Tech: HTML | CSS | Javascript | Node.js | Express | MySQL | Sequelize | Handlebars | Bcrypt

Stolen Canvas | GitHub Repo | Deployed Application
- This web application is a full fledged E-Commerce site that is based on the premise of pseudo-selling famous pieces of art as well as MS Paint drawing from the creators of the site.

Tech: HTML | CSS | Javascript | Node.js | Express | MySQL | Sequelize | Handlebars | Bcrypt

BarScout | GitHub Repo | Deployed Application
- This web application allows you to find bars in different cities, states, and counties. You will also be able to locate the bars near the searched location on a map.

Tech: HTML | CSS | Javascript | Google Places/Place Details API | Google Maps API | Fetch API

Weather Dashboard | [GitHub Repo](#) | [Deployed Application](#)
- A weather application that allows you to search for a city and get the daily weather report for that city. You will also be able to get the 5-day forecast of that searched city. Your recent searches will also be saved.

Tech: HTML | CSS | Javascript | OpenWeatherMap API | Fetch API

Password Generator | [GitHub Repo](#) | [Deployed Application](#)
- This is a password generator application. The user can choose between different criteria to include in their password and a random password will generate based on the user selected criteria. You also have the option to copy your generated password to your clipboard.

Tech: HTML | CSS | Javascript
